### SECTION 3 EXPRESSION OF OPINION

The liabilities described in this report by the term "policy and claims liabilities" refer to the liabilities described in the regulations to *The Insurance Act, 2001* by the term "actuarial liabilities". The author's opinion relates to the values of the policy and claims liabilities as summarized in Sections 3.2 and 3.3 of this report. The financial condition of the Company noted in Section 3.1 below refers to the financial state reflected by the amount, nature and composition of its assets, liabilities and equity, all at a particular point in time.

### **3.1** Report of the Appointed Actuary

I have examined the financial condition and valued the policy and claims liabilities of Guardian General Insurance Jamaica Limited for its balance sheet as at 31 December 2022 and the corresponding change in the policy and claims liabilities in the statement of operations for the year then ended. I meet the appropriate qualification standards and am familiar with the valuation and solvency requirements applicable to general insurance companies in Jamaica. I have relied upon PwC, for the substantial accuracy of the records and information concerning other liabilities, as certified in the attached statement.

In my opinion:

- i) the methods and procedures used in the verification of the data are sufficient and reliable and fulfil acceptable standards of care;
- ii) the valuation of policy and claims liabilities has been made in accordance with generally accepted actuarial practice, with such changes as determined and directions made by the Financial Services Commission;
- iii) the methods and assumptions used to calculate the policy and claims liabilities are appropriate to the circumstances of the Company and of the said policies and claims;
- iv) the amount of the policy and claims liabilities represented in the balance sheet of Guardian General Insurance Jamaica Limited makes proper provision for the future payments under the Company's policies and meets the requirements of *The Insurance Act, 2001* and other appropriate regulations of Jamaica;
- v) a proper charge on account of these liabilities has been made in the statement of operations;
- vi) there is sufficient capital available to meet the solvency standards as established by the Financial Services Commission;

# Independent auditor's report

To the Members of Guardian General Insurance Jamaica Limited

### Report on the audit of the financial statements

### **Our opinion**

In our opinion, the financial statements give a true and fair view of the financial position of Guardian General Insurance Jamaica Limited (the Company) as at 31 December 2022, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and with the requirements of the Jamaican Companies Act.

#### What we have audited

The Company's financial statements comprise:

- the statement of financial position as at 31 December 2022;
- the statement of comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### Independence

We are independent of the Company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

# Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards and with the requirements of the Jamaican Companies Act, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

PricewaterhouseCoopers, Scotiabank Centre, Duke Street, Box 372, Kingston, Jamaica T: (876) 922 6230, F: 876) 922 7581, www.pwc.com/jm

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
  fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
  evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
  a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
  involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

### Report on other legal and regulatory requirements

As required by the Jamaican Companies Act, we have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit.

In our opinion, proper accounting records have been kept, so far as appears from our examination of those records, and the accompanying financial statements are in agreement therewith and give the information required by the Jamaican Companies Act, in the manner so required.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 1. Identification and Activity

Guardian General Insurance Jamaica Limited (the "Company") is a limited liability company, incorporated and domiciled in Jamaica, with registered office at 19 Dominica Drive, Kingston 5, Jamaica. The Company is a whollyowned subsidiary of Guardian Group St. Lucia Holdings Limited (formerly Globe Holdings Limited) which is incorporated in St. Lucia. Guardian Group St. Lucia Holdings Limited is a wholly-owned subsidiary of Guardian Holdings Limited, a company which is incorporated in the Republic of Trinidad and Tobago. Guardian Holdings Limited is 61.77% owned by NCB Global Holdings Limited (NCBGH). Effective May 2019, the ultimate parent became Portland Holdings Inc., incorporated in Canada and controlled by the Honourable Michael A. Lee-Chin, OJ through NCB Financial Group (NCBFG), a company domiciled in Jamaica and listed on the Jamaica Stock Exchange (JSE).

The Company is licensed to operate as a general insurance company under the Insurance Act 2001. Its principal activity is the underwriting of property and casualty risks.

The financial statements were authorised for issue by the directors on 20 March 2023. The directors have the power to amend and reissue the financial statements.

#### 2. Significant accounting policies

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### 2.1. Basis of preparation

#### (i) Statement of compliance

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB"), and the requirements of the Jamaican Companies Act.

The Company presents its statement of financial position broadly in order of liquidity. An analysis regarding recovery or settlement within twelve months after the statement of financial position date (current) and more than 12 months after the statement of financial position date (non-current) is presented in the notes. Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. Income and expense will not be offset in the statement of comprehensive income unless required or permitted by an accounting standard or interpretation, as specifically disclosed in the

#### (ii) Basis of measurement

The financial statements have been prepared under the historical cost convention as modified by the revaluation of investment securities classified as fair value through profit or loss and fair value through other comprehensive income.

#### (iii) Judgements

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 6.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (Continued)

- 2.2. Adoption of new and revised International Financial Reporting Standards
  - (i) New standards and amendments/revisions to published standards and interpretations effective in 2022

A number of narrow-scope amendments to IFRS 3, IAS 16, IAS 17 and some annual improvements on IFRS 1, IFRS 9, IAS 41 and IFRS 16 (effective for annual periods beginning on or after 1 January 2022).

**Amendments to IAS 16, 'Property, plant and equipment'** prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company will recognise such sales proceeds and related cost in profit or loss.

Amendments to IAS 37, 'Provisions, contingent liabilities and contingent assets' specify which costs a company includes when assessing whether a contract will be loss-making.

**Annual improvements** make minor amendments to IFRS 1, 'First-time Adoption of IFRS', IFRS 9, 'Financial instruments', IAS 41, 'Agriculture' and the Illustrative Examples accompanying IFRS 16, 'Leases'.

Amendment to IFRS 16, 'Leases' – Covid-19 related rent concessions Extension of the practical expedient (effective 1 April 2021) As a result of the coronavirus (COVID-19) pandemic, rent concessions have been granted to lessees. In May 2020, the IASB published an amendment to IFRS 16 that provided an optional practical expedient for lessees from assessing whether a rent concession related to COVID-19 is a lease modification. On 31 March 2021, the IASB published an additional amendment to extend the date of the practical expedient from 30 June 2021 to 30 June 2022. Lessees can elect to account for such rent concessions in the same way as they would if they were not lease modifications. In many cases, this will result in accounting for the concession as variable lease payments in the period(s) in which the event or condition that triggers the reduced payment occurs.

# (ii) New standards and amendments/revisions to published standards and interpretations effective in 2022 but not applicable to the Company

#### IFRIC Agenda decision – Lessor forgiveness of lease payments (IFRS 9 and IFRS 16)

In October 2022, the IASB finalised the agenda decision approved by the IFRS Interpretation Committee (IFRS IC) on 'Lessor Forgiveness of Lease Payments (IFRS 9 and IFRS 16)'. The agenda decision addresses the accounting from the perspective of the lessor, and in particular:

• how the expected credit loss ('ECL') model in IFRS 9 should be applied to the operating lease receivable when the lessor expects to forgive payments due from the lessee under the lease contract before the rent concession is granted.

• whether to apply the derecognition requirements in IFRS 9 or the lease modification requirements in IFRS 16 when accounting for the rent concession.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

- 2.2. Adoption of new and revised International Financial Reporting Standards (continued)
  - (iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company

The following is a list of new standards, interpretations and amendments issued that are not yet effective as at 31 December 2022 and have not been early adopted by the Company.

Amendments to IAS 1, Practice statement 2 and IAS 8 (effective for annual periods beginning on or after 1 January 2023). The amendments aim to improve accounting policy disclosures and to help users of the financial statements to distinguish between changes in accounting estimates and changes in accounting policies. The company is currently evaluating the impact of these amendments, however they are not expected to have a material impact on the financial statements.

Amendment to IAS 12 – deferred tax related to assets and liabilities arising from a single transaction (effective for annual periods beginning on or after 1 January 2023). These amendments require companies to recognise deferred tax on transactions that, on initial recognition give rise to equal amounts of taxable and deductible temporary differences. The company is currently evaluating the impact of these amendments, however they are not expected to have a material impact on the financial

**Amendment to IFRS 16 – Leases on sale and leaseback** (effective for annual periods beginning on or after 1 January 2024). These amendments include requirements for sale and leaseback transactions in IFRS 16 to explain how an entity accounts for a sale and leaseback after the date of the transaction. Sale and leaseback transactions where some or all the lease payments are variable lease payments that do not depend on an index or rate are most likely to be impacted. The company is currently evaluating the impact of these amendments, however they are not expected to have a material impact on the financial statements.

**Amendment to IAS 1 – Non current liabilities with covenants** (effective for annual periods beginning on or after 1 January 2024). These amendments clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability. The company is currently evaluating the impact of these amendments, however they are not expected to have a material impact on the financial statements.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.2. Adoption of new and revised International Financial Reporting Standards (continued)

# (iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company (continued)

**IFRS 17, 'Insurance contracts'** (effective for annual periods beginning on or after 1 January 2023). This standard replaces IFRS 4, which permits a wide variety of practices in accounting for insurance contracts. IFRS 17 will fundamentally change the accounting by all entities that issue insurance contracts and investment contracts with discretionary participation features. IFRS 17 will materially change the recognition and measurement of insurance contracts and the corresponding presentation and disclosures in the financial statements.

#### **Transition Approach**

IFRS 17 must be applied retrospectively. However, if full retrospective application to a group of contracts is impractical, the modified retrospective or fair value methods may be used. The drivers for impracticability for retrospective application relate to a lack of required data and the use of hindsight, consistent with the principles of IAS 8, Accounting Policies, Changes in Accounting Estimates and Errors. The transition approach can have a significant impact on the contractual service margin ("CSM"), and relatedly, on both shareholders' equity and profits on in-force business in future reporting periods. On transition, the Company will apply the full retrospective approach according to the data that is available for the various groups of contracts, and the date from which it is available.

#### **Redesignation of Financial Assets**

The Company, having previously applied IFRS 9, is permitted to change its classification and designation of financial assets. This reassessment is relevant only to eligible financial assets held in connection with insurance contracts under the scope of IFRS 17. Any redesignation will be based on facts and circumstances that exist at the date of initial application of IFRS 17 and will be applied on that date. When applying the IFRS 9 transition requirements, the date of initial application is considered the date of initial application of IFRS 17. Some financial assets will be reclassified upon implementation of IFRS 17.

#### Level of Aggregation

For measurement purposes, IFRS 17 requires contracts to be grouped together into contracts that are managed together and have similar risk and profitability profiles, all within the same issue year. The resulting portfolios are roughly similar to that which existed under IFRS 4 for internal management reporting purposes, although the profitability and cohort grouping requirements are new. With respect to cohort grouping, the Company decided to apply annual cohorts to all portfolios where the Premium Allocation Approach ("PAA") is applied, and quarterly cohorts to all other portfolios.

#### Scope, Definition, and Classification

All contracts classified as insurance products under IFRS 4 will continue to be defined as such under IFRS 17, and similarly, all contracts that meet the definition of an insurance contract under IFRS 17 also had done so under IFRS 4. The definition of insurance risk will also be maintained, except to add that benefits payable is determined on a present value basis. Further, there was no significant impact on the recognition and derecognition of insurance contracts under IFRS 4 as compared with IFRS 17.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

- 2.2. Adoption of new and revised International Financial Reporting Standards (continued)
  - (iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company (continued)

#### IFRS 17, 'Insurance contracts' (continued)

#### **Measurement Models**

The standard requires that insurance liabilities be measured using the General Measurement Model ("GMM"), with modifications to this approach available for certain types of contracts. The Premium Allocation Approach ("PAA") will be automatically applied to short-term contracts where the profit is realised within twelve months, but also to contracts with durations of up to 2 years, where the PAA eligibility criteria were successfully met.

#### **Onerous contracts**

IFRS 17 requires the identification of groups of onerous contracts. When these groups are identified, the Company is required to recognise a loss immediately in profit or loss along with an increase in the insurance contract liability known as a loss component. Where the Company has reasonable and supportable information to conclude that a set of contracts will all be in the same profitability group for IFRS 17, these contracts are evaluated together based on aggregate expected profitability to determine if the insurance contracts are onerous in the reporting period in which they are first effective.

#### **Major Accounting Policies**

#### Discount Rates

For PAA business, no discounting will be applied to the Liability for Remaining Coverage ("LRC") or to claims and other cash flows that are expected to occur within 1 year of the reporting period.

#### Risk Adjustment

The Company will apply a cost of capital approach for the risk adjustment within the Property & Casualty business units.

#### Insurance acquisition costs

The Company has elected not to apply the option allowed under IFRS 17.59(a) for contracts measured under the PAA to recognise insurance acquisition cash flows as an expense when incurred. Instead, these costs will be captured within the insurance contract liability and then amortised over the life of the insurance contract.

Notes to the Financial Statements **31 December 2022** (expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

- 2.2. Adoption of new and revised International Financial Reporting Standards (continued)
  - (iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company (continued)

#### IFRS 17, 'Insurance contracts' (continued)

#### **Presentation and Disclosure**

The Company has made the following presentation and disclosure decisions:

- As allowed by IFRS 17.81, the entire change in the risk adjustment for non-financial risk will be
- included as part of the insurance service result.
- As allowed by IFRS 17.86, income and expenses from reinsurance contracts held will be presented on a net basis in the statement of income.
- As allowed by IFRS 17.89, the Company will disaggregate insurance finance income or expenses between amounts allocated to profit or loss to eliminate accounting mismatches with income and
- expenses in profit or loss on the underlying items held, and to other amounts allocated to other comprehensive income.
- As allowed by IFRS 17.96(a), the Company will aggregate insurance contracts by type of contract or major product line for disclosure purposes.

#### Impact on Insurance Contract Balances and Profitability

IFRS 17 introduces many new measurement criteria that will have an impact on the Company's results, including the following:

#### Insurance Revenue

IFRS 17 measures revenue based on the delivery of services to policyholders and, importantly, excludes any premiums related to the investment elements of policies. The determination of what constitutes an investment component is an area of judgement significantly affecting amounts of recognised insurance revenue and insurance service expenses as investment components should be excluded from those. An investment component exists where the contract requires the Company to pay the policyholder even if the insured event does not occur either upon the surrender of the policy or at the request of the policyholder. The impact of this is a reduction of insurance revenue.

Applying considerations from IFRS 17 and IFRS 15, 'Contracts with Customers', the Company now combines fronting contracts with the related insurance policies if certain conditions are met, eliminating the premium income against the reinsurance premium expense. This adjustment will reduce insurance revenue and reinsurance expenses by a commensurate amount and therefore has no net impact to profitability.

#### • Insurance Service Expenses

IFRS 17 requires the identification of all fulfilment cash flows including operating expenses and overheads that are directly attributable to the acquisition and management of insurance contracts. Such expenses have been classified within operating expenses under IFRS 4. A systematic and rational method to identify and allocate such overheads to insurance and reinsurance contracts has been implemented. These expenses will be reallocated – either directly to insurance service expenses, or initially as a reduction in the insurance contract liability, where they are then amortised to the insurance service expenses, and a commensurate increase in insurance service expenses and decrease in the insurance contract liability.

Notes to the Financial Statements **31 December 2022** (expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

- 2.2. Adoption of new and revised International Financial Reporting Standards (continued)
  - (iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company (continued)

#### IFRS 17, 'Insurance contracts' (continued)

#### Impact on Insurance Contract Balances and Profitability (continued)

#### • Insurance Contract Liability

#### **Risk Adjustment**

Risk adjustment (RA) for non-financial risk is a defined term in IFRS 17 which states:

"An entity shall adjust the estimate of the present value of future cash flows to reflect the compensation that the entity requires for bearing the uncertainty about the amount and timing of the cash flows that arises from non-financial risk." (IFRS17.37)

Further clarification is provided in IFRS17.B86-B92. These paragraphs emphasize that the RA relates only to non-financial risk. Insurance risk, lapse risk, and expense risk are listed as examples of risks that are included, whereas operational risks and market risks are excluded.

IFRS17.B91 clearly states that IFRS17 does not prescribe the estimation technique(s) used to determine the RA, and IFRS 17.B92 notes that "an entity shall apply judgment."

IFRS17.B91 states that the RA would have the following characteristics:

- a) risks with low frequency and high severity will result in higher risk adjustments for non-financial risk than risks with high frequency and low severity;
- b) for similar risks, contracts with a longer duration will result in higher risk adjustments for nonfinancial risk than contracts with a shorter duration;
- c) risks with a wider probability distribution will result in higher risk adjustments for non-financial risk than risks with a narrower distribution;
- d) the less that is known about the current estimate and its trend, the higher will be the risk adjustment for non-financial risk; and
- e) to the extent that emerging experience reduces uncertainty about the among and timing of cash flows, risk adjustments for non-financial risk will decrease and vice versa.

#### **Discount Rates**

Under IFRS17 the allowed discount rate must be company-specific and principle based; it should reflect the risk characteristics of the cash flows arising from the insurance contracts. It should not reflect risk characteristics of financial instruments held by the insurer unless the insurance contract cash flows have the same risk characteristics.

Under IFRS 17, the discount rate used to present value future cashflows is disconnected from the assets the Company holds to support its insurance contract liabilities. As a result, the Company is considering electing the other comprehensive income option under IFRS 17 for insurance contract liabilities and the fair value through other comprehensive income option under IFRS 9 for fixed income assets.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

- 2.2. Adoption of new and revised International Financial Reporting Standards (continued)
  - (iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company (continued)

#### IFRS 17, 'Insurance contracts' (continued)

#### • Insurance Contract Liability (continued)

#### The Timing of Recognition of Losses and Gains

Under IFRS 17, new business gains are recorded on the Statements of Financial Position (in the CSM component of the insurance contract liability) and amortized into income as services are provided. New business losses are recorded into income immediately. Under CPPM, both new business gains and new business losses are recognized in income immediately.

Note that the above changes, while impacting the insurance contract liability, may also have consequential impacts on revenue recognition, insurance service expenses, finance expenses, and other items in the statement of income.

Overall, IFRS 17 will have a significant impact on the Company's financial statements, tax and regulatory capital positions and other financial metrics that are dependent upon IFRS accounting values. Despite these changes in recognition criteria, IFRS 17 does not impact the cash flows generated by the business, and hence, does not impact the economics of the Company's business.

#### **Implementation Project Structure and Status**

There is a Group-wide IFRS 17 implementation programme, led by an Executive Project Sponsor, which involves significant enhancements to the Group's IT, actuarial, and finance systems. These three (3) elements were organised into three (3) separate but highly collaborative project streams to ensure attention to detail while achieving the cohesiveness required of the programme. Key tasks within the programme included:

#### • Identifying data requirements.

This is one of the most significant aspects of the IFRS 17 implementation. This new standard requires a higher level of granularity in cash flow and other data to appropriately measure insurance contracts and make the necessary disclosures for reporting purposes.

#### Identifying and implementing changes to systems and processes

As a result of the IFRS 17 implementation, new systems were acquired, and functionality of existing systems were expanded. Functionality was expanded for accounting and reporting systems.

#### • Determining the appropriate accounting policies and formulating disclosures.

There are many accounting policy options with IFRS 17, but also many ways in which a required policy or disclosure can be formulated. Various approaches were carefully considered before the Group arrived at its final result.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.2. Adoption of new and revised International Financial Reporting Standards (continued)

(iii) New standards, interpretations and revised or amended standards that are not yet effective and have not been early adopted by the Company (continued)

#### IFRS 17, 'Insurance contracts' (continued)

#### Implementation Project Structure and Status (continued)

An IFRS 17 Executive and Technical Committee, which includes the Group's CEOs, provides oversight and strategic direction to the implementation programme. A Finance sub-committee was also in place to provide governance over the technical interpretation and accounting policies selected, design and delivery of the programme. During 2022, the Group finalised the build and testing of new finance systems and transitioned the new elements of the financial statement close process into its day-to-day operations. IFRS 17 will be implemented effective 1 January 2023, with further refinement and consideration of estimates and areas of judgement ongoing.

#### 2.3 Revenue recognition

#### (i) Underwriting income

Premiums are recognised over the life of the policies written. The portion of premiums written in the current year which relates to coverage in subsequent years is deferred as unearned premiums (Note 2.6). Commissions earned on the reinsurance of risks are credited to revenue over the life of the policies.

#### (ii) Investment income

Interest income is recognised using the effective interest method. Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets, except under IFRS 9

- Purchased or originated credit-impaired financial assets, for which the original credit-adjusted effective interest rate is applied to the amortised cost of the financial asset.
- Financial assets that are not purchased or originated credit-impaired but have subsequently become credit-impaired, for which interest revenue is calculated by applying the effective interest rate to their amortised cost i.e. net of the expected credit loss provision.

#### (iii) Dividend

Dividend income for equities is recognised when the right to receive payment is established.

Unrealised gains and losses on investment securities measured at fair value through other comprehensive income are recognised in other comprehensive income. On derecognition, debt securities gains and losses accumulated in other comprehensive income are reclassified to profit or loss.

#### (iv) Realised and unrealised investment gains and losses

Realised and unrealised gains and losses on investments measured at amortised cost or fair value through profit or loss are recognised in profit or loss in the period in which they arise.

Unrealised gains and losses on investment securities measured at fair value through other comprehensive income are recognised in other comprehensive income. On derecognition, debt securities gains and losses accumulated in other comprehensive income are reclassified to profit or loss.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.4 Insurance contracts

Insurance contracts are those contracts that transfer significant insurance risk. The Company's insurance contracts are classified as short-term insurance contracts which include casualty, marine, motor insurance and property insurance contracts.

- Property insurance contracts mainly compensate the Company's customers in the event of loss from a specified insured peril up to the insured amount and within the terms of the policy conditions. These contracts are issued for both private and commercial risks. Customers who undertake commercial activities on their premises could also receive compensation for consequential loss/business interruption caused by insured perils.
- Motor insurance contracts indemnify the Company's customers for their legal requirement under the road traffic legislation. These contracts may be extended for additional coverage such as physical damage, theft and personal accident.
- Casualty insurance contracts provide coverage for liability exposures that indemnify the Company's
  customers against actions from third parties, which are subject to the policy limits and conditions. The
  typical protection offered is designed for employers who become legally liable to pay compensation to
  injured employees (employers' liability) and employers who become liable to pay compensation to third
  parties for bodily harm or property damage (public liability).
- Marine insurance contracts indemnify the Company's customers for loss or damage to their insured cargo, commercial hull and pleasure craft vessels. Third party coverage is also provided.

For these contracts, premiums are recognised as revenue (earned premiums) proportionally over the period of coverage. The portion of premium received on in-force contracts that relates to unexpired risk at the statement of financial position date is reported as the unearned premium liability. Premiums are shown before deductible commissions payable agents and brokers and exclude any taxes or duties levied on such premiums. Premium income includes premiums collected by agents and brokers not yet received by the Company.

Some insurance contracts permit the Company to sell (usually damaged) property acquired in settling a claim (salvage). The Company may also have the right to pursue third parties for payment of some of all costs (subrogation). The estimated cost of claims includes a deduction for the expected value of salvage and other recoveries.

Claims and loss adjustments expenses are charged to profit or loss as incurred based on estimated liability for compensation owed to contract holders or third parties damaged by the contract holders. They include direct and indirect claims settlement costs and arise from events that have occurred up to the statement of financial position date even if they have not yet been reported to the Company. The Company does not discount its liabilities for unpaid claims other than for disability claims. Liabilities for unpaid claims are estimated using techniques such as the input of assessments for individual cases reported to the Company and statistical analyses for claims incurred but not reported (IBNR), and to estimate the expected ultimate cost of more complex claims that may be affected by external factors such as court decisions. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are recognized within claims expense in the current year.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.5 Receivables and payables related to insurance contracts

Receivables and payables are recognised when due. These include amounts due to and from agents, brokers and insurance contract holders.

If there is objective evidence that the insurance receivable is impaired, the Company reduces the carrying amount of the insurance receivable accordingly and recognises the impairment loss in profit or loss.

#### 2.6 Provision for unearned premiums

Unearned premiums represent the portion of premiums written in the current year that relate to periods of insurance subsequent to the statement of financial position date calculated using the three hundred and sixty-fifths method. Unearned premiums relating to marine cargo are calculated using the shorter of the three hundred and sixty-fifths method and the term of the contract effective after the first date of sailing.

#### 2.7 Provision for unexpired risks

The provision for unexpired risks is determined by the appointed actuary and represents the expected future costs associated with the unexpired portion of policies in force as of the statement of financial position date, in excess of the net unearned premium minus net deferred policy acquisition costs.

#### 2.8 Provision for claims outstanding

The provision for claims outstanding represents estimates of the cost of settling claims made, but not paid as of the statement of financial position date, less expected reinsurance recoveries. The provision for claims incurred but not reported ("IBNR") is actuarially determined by the appointed actuary in accordance with the actuarial regulations of the Insurance Act, 2001. Estimates are continually revised as more information becomes available and for the effects of anticipated inflation. Adjustments arising on these revisions are included with claims expense in the current year.

#### Liability adequacy test

At each statement of financial position date, the Company assesses whether its recognised insurance liabilities are adequate, using current estimates of future cash flows under its insurance contracts. If that assessment shows that the carrying amount of its insurance liabilities is inadequate, the deficiency is recognised in the statement of income and the amount of the relevant insurance liabilities is increased.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.9 Reinsurance

Contracts entered into by the Company with reinsurers under which the Company is compensated for losses on one or more contracts issued by the Company are classified as reinsurance contracts.

The benefits to which the Company is entitled under its reinsurance contracts held are recognised as reinsurance assets. These assets consist of short-term balances due from reinsurers as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognised as an expense when due.

Estimated amounts of reinsurance recoverable, which represent the unearned portion of premiums ceded to the reinsurers are included in recoverable from reinsurers on the statement of financial position.

The Company assesses its reinsurance assets for impairment. If there is objective evidence that the reinsurance asset is impaired, the Company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognises that impairment loss in profit or loss.

#### 2.10 Unearned commission

The unearned commission represents the actual commission income on premium ceded on proportional reinsurance contracts relating to the unexpired period of risk carried. The income is deferred as unearned commission reserves, and amortised over the period in which the commissions are expected to be earned. These reserves are calculated on the 365th method.

#### 2.11 Deferred policy acquisition costs ("DAC")

Commissions and other acquisition costs that vary with and are related to securing new contracts and renewing existing contracts are deferred and recognised as an asset. All other costs are recognised as expenses when incurred. The DAC is subsequently amortised as premium is earned over the life of the contracts.

#### 2.12 Property and equipment and intangible assets

Property and equipment are stated at historical cost less accumulated depreciation and accumulated impairment, if any. Intangible assets are stated at historical cost less accumulated amortisation and accumulated impairment, if any. Historical cost includes expenditure directly attributable to the acquisition of the items.

Acquired computer software licences and website development costs are capitalised as intangible assets on the basis of the costs incurred to acquire and bring to use the specific software. Costs that are directly associated with the development of identifiable and unique software products controlled by the Company, and that will probably generate economic benefits exceeding costs beyond one year, are also recognised as intangible assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. Repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.12 Property and equipment and intangible assets (continued)

Property and equipment and intangible assets with the exception of freehold land, on which no depreciation is provided, are depreciated/amortised on a straight-line basis over the estimated useful lives of the assets as follows:

Computer and Equipment	33 1/3 %
Furniture and fixtures	10% - 20%
Motor vehicles	20%
Leasehold improvements	Shorter of period of lease or useful life of asset
Intangible assets	33 1/3 %

The residual values and useful lives are reviewed, and adjusted if appropriate, at each statement of financial position date.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with their carrying amount. These are included in the statement of comprehensive income.

#### 2.13 Foreign currency translation

#### (i) Functional and presentation currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which the Company operates ('the functional currency'). The financial statements are presented in thousands of Jamaican dollars, which is the Company's functional and presentation currency.

#### (ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the statement of comprehensive income.

#### 2.14 Investments

#### (a) Initial recognition and measurement

Financial assets are recognised when the Company becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised on settlement date, the date on which the Company commits to purchase or sell the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

At initial recognition, the Company measures financial assets at its fair value plus, in the case of financial assets not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of financial assets. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.14 Investments (continued)

#### (a) Initial recognition and measurement (continued)

The Company's financial assets include cash and bank deposits, investment in debt and equity securities, interest receivable, receivables arising from insurance contracts and reinsurance contracts and other loans and receivables.

#### (b) Classification and subsequent measurement

#### **Debt instruments**

The Company's debt instruments are measured in accordance with the business models determined for managing the asset and the cash flow characteristics of the asset.

There are three measurement categories into which the Company classifies its debt instruments:

- (i) Amortised cost Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. The carrying amounts of these assets are adjusted by any expected credit loss allowance recognised. In addition to certain debt securities, the Company's loans and receivables are carried at amortised cost.
- (ii) Fair value through other comprehensive income Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses which are recognised in profit or loss.
- (iii) Fair value through profit or loss Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss is recognised in profit or loss in the period in which it arises. The Company may, on initial recognition, irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or fair value through other comprehensive income as fair value through profit or loss, if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise. Financial assets held for trading, or are managed and whose performance is evaluated on a fair value basis, are measured at fair value through profit or loss.

The Company reclassifies debt instruments when and only when its business model for managing these assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be infrequent.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.14 Investments (continued)

#### (b) Classification and subsequent measurement (continued)

#### **Debt instruments (continued)**

#### Business model assessment

The Company determines its business models at the level that best reflects how it manages groups of financial assets to achieve its business objective. Factors considered by the business units in determining the business model for a group of assets include:

- the stated policies and objectives for the group of assets and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets with the duration of any related liabilities or expected cash outflows or realising cash flows through sale of the assets;
- · how performance of the group of assets is evaluated and reported to management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected);
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

If cash flows after initial recognition are realised in a way that is different from original expectations, the business units do not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets.

#### The solely payment of principal and interest (SPPI) test

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount). 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and other basic lending risks and costs, as well as a profit margin.

Where the business model is to hold assets and collect contractual cash flows or to collect contractual cash flows and sell, the Company's business units assess whether the financial assets' cash flows represent solely payments of principal and interest. In making this assessment, the business units considers whether the contractual cash flows are consistent with a basic lending arrangement i.e. the definition of interest. Where the contractual terms introduce exposure to risk or volatility that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at fair value through profit or loss.

#### Equity instruments

Subsequent to initial recognition, the Company measures all equity investments at fair value, and changes in the fair value of equity instruments are recognised in profit or loss.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.14 Investments (continued)

#### (c) Derecognition of financial asset

A financial asset (or when applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired.
- the Company retains the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a 'pass-through' arrangement.
- the Company has transferred its rights to receive cash flows from the asset and either:
  - has transferred substantially all the risk and rewards of the asset, or
  - has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its right to receive cash flows from an asset and has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company's continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received is recognised in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at fair value through other comprehensive income, the cumulative gain or loss previously accumulated in the fair value reserve is reclassified to profit or loss.

#### 2.15 Income taxes

Taxation expense in the statement of comprehensive income comprises current and deferred income tax charges.

Current income tax charges are based on taxable profits for the year, which differ from the profit before tax reported because it excludes items that are taxable or deductible in other years, and items that are never taxable or deductible. The Company's liability for current income tax is calculated at tax rates that have been enacted at statement of financial position date.

Deferred tax is the tax expected to be paid or recovered on differences between the carrying amounts of assets and liabilities and the corresponding tax bases. Deferred tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax is charged or credited in profit or loss, except in instances where deferred tax relates to items recognised directly in other comprehensive income, in which case, deferred tax is charged or credited to other comprehensive income.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current income tax liabilities and when the deferred taxes relate to the same fiscal liability.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.16 Employee benefits

#### (i) Pension Scheme

The Company operates a defined contribution scheme. A defined contribution scheme is a pension plan under which the Company pays fixed contributions into a separate entity. The Company has no legal obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. The contributions are recognised as employees' benefit expense when they are due. Prepaid contributions are recognised as an asset to the extent that a cash refund or reduction in the future payments is available.

#### (ii) Leave accrual

Employees' entitlements to annual leave are recognised when they accrue to employees. A provision is made for the estimated liability for annual leave as a result of services rendered by employees up to the statement of financial position date.

#### (iii) Termination benefits

Termination benefits are payable whenever an employee's employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits when it is demonstrably committed to either terminate the employment of current employees according to a detailed formal plan without the possibility of withdrawal or to provide termination benefits as a result of an offer made to encourage voluntary redundancy. Benefits falling due more than twelve (12) months after the statement of financial position date are discounted to present value.

#### (iv) Employee benefit obligations

Post-retirement medical benefits are provided for the pensioners of the Company. Post retirement obligation included in the financial statements has been actuarially determined by an independent qualified actuary that was appointed by management. The actuarial valuation was conducted in accordance with the requirements of IAS 19, using the projected unit credit method.

Remeasurements, comprising of actuarial gains and losses, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets (excluding amounts included in net interest on the net defined benefit liability), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through the statement of comprehensive income in the period in which they occur. Remeasurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- · The date of the plan amendment or curtailment, and
- The date that the Company recognises related restructuring costs.

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Company recognises the following changes in the net defined benefit obligation under expenses in profit or loss:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income

Notes to the Financial Statements **31 December 2022** (expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.16 Employee benefits (continued)

#### (v) Cash-based long-term performance incentive plan

Effective 1 January 2017, the Company replaced its equity-settled share-based compensation plan with a cash-based long-term performance incentive plan. Accruals are made annually based on the ultimate expected and approved payments to eligible executives.

#### (vi) Bonus plan

The Company recognizes a liability and an expense for bonuses based on a formula that takes into consideration the profit attributable to the Company's shareholders after certain adjustments. The Company recognizes a provision where contractually obligated or where there is a past practice that has created a constructive obligation.

#### 2.17 Provisions

Provisions are recognised when there is a present legal or constructive obligation as a result of past events, if it is probable that an outflow of resources will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made.

#### 2.18 Leases

#### As a lessee

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date
- amounts expected to be payable by the Company under residual value guarantees
- the exercise price of a purchase option if the Company is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the group exercising that option

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

Lease payments are allocated between principal and finance cost. The finance cost is charged to the statement of comprehensive income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received
- · any initial direct costs, and
- restoration costs.

#### 2.19 Share Capital

Shares are classified as equity when there is no obligation to transfer cash and other assets. Incremental cost directly attributable to the issue of equity instruments are shown in equity as a deduction from the proceeds.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.20 Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise cash and bank balances, deposits held at call with banks, and other short-term highly liquid investments with maturities of 90 days or less, net of bank overdrafts.

Cash and cash equivalents are carried at amortised cost on the statement of financial position.

#### 2.21 Impairment of non-financial assets

The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs to sell and its value in use. The recoverable amount is determined on an individual asset basis, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset or CGU is considered impaired and written down to its recoverable amount.

#### 2.22 Impairment of financial assets

At each reporting date, the Company assesses, on a forward-looking basis, the expected credit losses (ECL) associated with its financial assets measured at amortised cost and fair value through other comprehensive income (excluding equity instruments).

The Company measures loss allowances on its debt instruments at an amount equal to lifetime ECL, except in the following cases, for which the amount recognised is 12-month ECL:

- · Debt securities that are determined to have low credit risk at the reporting date; and
- Other financial instruments for which credit risk has not increased significantly since initial recognition.

Lifetime ECL are the ECL that result from all possible default events over the expected life of a financial asset, whereas 12-month ECL are the portion of ECL that results from default events that are possible within the 12 months after the reporting date.

For receivables, the Company applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

Loss allowances for ECL are presented in the financial statements as follows:

- Financial assets measured at amortised cost: the loss allowance is deducted from the gross carrying
  amount of the assets in the statement of financial position. Movement in ECL is recognised in profit or
  loss.
- Debt instruments measured at fair value through other comprehensive income: the loss allowance is
  recognised in other comprehensive income with the corresponding entry recognised in profit or loss. The
  loss allowance does not reduce the carrying amount of the financial asset in the statement of financial
  position.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.22 Impairment of financial assets (continued)

#### Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Company compares the risk of a default occurring as at the reporting date with the risk of default occurring as at the date of initial recognition. In making this assessment, the Company considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort. Forward-looking information considered includes the future prospects of the industries in which the Company's debtors operate, obtained from economic expert reports, financial analysts, governmental bodies and other similar organisations, as well as consideration of various external sources of actual and forecast economic information that relate to the Company's core operations.

The quantitative assessment to identify whether a significant increase in credit risk has occurred for an exposure is performed by comparing:

- the remaining lifetime probability of default as at the reporting date; with
- the remaining lifetime probability of default for this point in time that was estimated at the time of initial recognition of the exposure.

#### Significant increase in credit risk (continued)

The qualitative assessment to identify whether credit risk has increased significantly since initial recognition takes into account the following:

- Actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- Actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the debtor's ability to meet its obligations;
- Actual or expected significant changes in the operating results of the debtor;
- Significant increases in credit risk on other financial instruments of the debtor;
- Significant changes in the expected performance and behaviour of the debtor, including changes in the payment status of debtor;
- Actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant change in the debtor's ability to meet its debt obligation.

Irrespective of the outcome of the above assessment, the Company presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Company has reasonable and supportable information that demonstrated otherwise.

Despite the aforementioned, the Company assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date. A financial instrument is determined to have low credit risk if the financial instrument has a low risk of default, the debtor has a strong capacity to meet its contractual cash flow obligations in the near term and adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the debtor to fulfil its contractual cash flow obligations. The Company considers a debt instrument to have low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.22 Impairment of financial assets (continued)

#### Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortised cost and debt instruments carried at fair value through comprehensive income are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the debtor or issuer;
- A breach of contract, such as a default or past due event;
- The disappearance of an active market for a financial asset because of financial difficulties;
- It is becoming probable that the debtor will enter bankruptcy or other financial reorganisation; or
- Rating agencies' assessments of creditworthiness.

#### Definition of default

The Company considers a financial asset to be in default when:

- the debtor is unlikely to pay its credit obligations to the Company in full, without recourse by the Company to actions such as realising security (if any is held); or
- the debtor is past due more than 90 days unless the Company has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

In assessing whether a debtor is in default, the Company considers indicators that are qualitative, quantitative and based on data developed internally and obtained from external sources.

#### Write off

The Company writes off financial assets, either partially or in full, when it has exhausted all practical recovery efforts and has concluded there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include ceasing enforcement activity and where the Company's recovery method is foreclosing on collateral and the value of the collateral is such that there is no reasonable expectation of recovering in full.

If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount.

#### Measurement of expected credit losses

The measurement of expected credit losses is a function of:

- (i) Probability of default an estimate of the likelihood of default over a given time horizon;
- (ii) Loss given default an estimate of the loss arising in the case where a default occurs at a given time; and
- (iii) Exposure of default an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.22 Impairment of financial assets (continued)

The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Forward-looking information considered by the Company includes economic data and forecasts published by governmental bodies and monetary authorities, supranational organisations such as the Organization for Economic Cooperation and Development and the International Monetary Fund, and selected private-sector and academic forecasters.

Expected credit losses are measured as the present value of all cash shortfalls i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive, discounted at the original effective interest rate.

#### 2.23 Fair value measurement

The mechanics of the expected credit losses method are summarised below:

- A financial instrument that is not credit-impaired on initial recognition, a 12-month ECL allowance is calculated. The Company calculates the12-month ECL allowance based on the expectation of a default occurring in the twelve months following the reporting date. The expected12-month default probability is applied to a forecast exposure at default and multiplied by the expected loss given default, and discounted by the original effective interest rate.
- When a financial instrument has shown a significant increase in credit risk since initial recognition, the Company records an allowance for life-time ECL. The mechanics are similar to 12-month ECL calculation on a financial instrument that is not credit-impaired on initial recognition, but default probability and loss given default are estimated over the life of the instrument.
- For a financial instrument that is credit-impaired, but is not a purchased or originated credit-impaired financial instrument, the Company records an allowance for lifetime ECL calculated similar to lifetime ECL on a financial instrument that has shown a significant increase in credit risk since initial recognition.
- Purchased or credit-impaired financial assets are assets that are credit-impaired on initial recognition. ECL on these assets are always measured on a lifetime basis, discounted by a credit adjusted effective interest rate. The Company has no purchased or credit-impaired financial instruments.

Where lifetime ECL is measured on a collective basis to cater for cases where evidence of significant increases in credit risk at the individual instrument level may not yet be available, the financial instruments are grouped on the basis of shared risk characteristics that include: instrument type; credit risk ratings; nature, size and industry of debtors; collateral type; and geographic location of the debtor.

If the Company has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Company measures the loss allowance at an amount equal to 12-month ECL at the current reporting date.

The Company measures financial instruments at fair value at each statement of financial position date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- in the principal market for the asset or liability, or
- in the absence of a principal market, in the most advantageous market for the asset or liability

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 2. Significant accounting policies (continued)

#### 2.23 Fair value measurement (continued)

The principal or the most advantageous market must be accessible to the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. When one is available the Company measures the fair value of an instrument using quoted prices in an active market. If there is no quoted price in an active market, the Company establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analysis making use of market inputs and relying as little as possible on entity-specific inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- (i) Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities. Financial assets in this category are measured in whole or in part by reference to published quotes in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
   Financial assets are measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions, and for which pricing is obtained via pricing services, but where prices have not been determined in an active market. This includes financial assets with fair values based on broker quotes, investments in mutual funds with published net asset values and evidence of trades and assets that are valued using the Company's own models whereby the majority of assumptions are market observable.
- (iii) Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable. Assets and liabilities included in Level 3 are held at cost, being the fair value of the consideration paid on acquisition and are regularly assessed for impairment. These financial assets are not quoted as there are no active markets to determine a price. The main asset class in this category is unlisted equity instruments.

For assets and liabilities that are recognized in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

#### 2.24 Financial instruments

Financial instruments carried on the statement of financial position include cash, investments, other receivables, and other liabilities. The particular recognition methods adopted are disclosed in the individual policy statements associated with each item. The determination of the fair values of the Company's financial instruments is discussed in Note 5.

#### 2.25 Dividend distribution

Dividends are recorded as a deduction from shareholders' equity in the period in which they are approved.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 3. Insurance and Financial Risk Management

The Company's activities expose it to a variety of insurance and financial risks and those activities involve the analysis, evaluation, acceptance and management of some degree of risk or combination of risks. Taking risk is core to the financial business, and the operational risks are an inevitable consequence of being in business. The Company's aim is therefore to achieve an appropriate balance between risk and return and minimize potential adverse effects on the Company's financial performance.

The Company's risk management policies are designed to identify and analyse these risks, to set appropriate risk limits and controls, and to monitor the risks and adherence to limits by means of reliable and up-to-date information systems. The Company regularly reviews its risk management policies and systems to reflect changes in markets, products and emerging best practice.

The Board of Directors is ultimately responsible for the establishment and oversight of the Company's risk management framework. The Board has established committees/departments for managing and monitoring risks, as follows:

(i) Finance Department

The Finance Department is responsible for managing the Company's assets and liabilities and the overall financial structure. It is also primarily responsible for managing the funding and liquidity risks of the Company.

(ii) Investment Committee

The Investment Committee is responsible for monitoring the investment portfolio, and the development of investment strategies for the Company. The Investment Committee is also responsible for the establishment of appropriate trading limits, reports and compliance controls to ensure that its mandate is properly followed.

(iii) Audit Committee

The Audit Committee oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

The most important types of risk faced by the Company are insurance risk, credit risk, liquidity risk and market risk. Market risk includes currency risk, interest rate and equity price risk.

#### (a) Insurance Risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claim payments exceed the carrying amount of the insurance liabilities.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 3. Insurance and Financial Risk Management (continued)

#### (a) Insurance Risk (continued)

Management maintains an appropriate balance between commercial and personal policies and type of policies based on guidelines set by the Board of Directors. Insurance risk arising from the Company's insurance contracts is, however, concentrated within Jamaica.

The Company has the right to re-price the risk on renewal. It also has the ability to impose deductibles and reject fraudulent claims. Where applicable, contracts are underwritten by reference to the commercial replacement value of the properties or other assets and contents insured. Claims payment limits are always included to cap the amount payable on occurrence of the insured event. The cost of rebuilding properties, of replacement or indemnity for other assets and contents and the time taken to restart operations for business interruption are the key factors that influence the level of claims under these policies.

The frequency or severity of claims and benefits can be affected by the increasing number of cases that are going to court for settlement and the level of awards. Estimated inflation is also a significant factor due to the long period typically required to settle these cases.

Claims on insurance contracts are payable on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time and a portion of the claims provision relates to IBNR claims.

There are several variables that affect the amount and timing of cash flows from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopted.

The compensation paid on these contracts is the monetary awards granted for bodily injury suffered by employees (for employer's liability covers) or members of the public (for public liability covers). Such awards are lump-sum payments that are calculated as the present value of the lost earnings and rehabilitation expenses that the injured party will incur as a result of the accident.

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and other recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is likely that the final outcome will prove to be different from the original liability established. The liability for these contracts comprises a provision for IBNR, a provision for reported claims not yet paid and a provision for unexpired risks at the statement of financial position date. The amount of casualty claims is particularly sensitive to the level of court awards and to the development of legal precedent on matters of contract and tort. Casualty contracts are also subject to the emergence of new types of latent claims, but no allowance is included for this at the statement of financial position date.

In calculating the estimated cost of unpaid claims (both reported and not), the Company uses estimation techniques that are a combination of loss-ratio-based estimates (where the loss ratio is defined as the ratio between the ultimate cost of insurance claims and insurance premiums earned in a particular financial year in relation to such claims) and an estimate based upon actual claims experience using predetermined formulae where greater weight is given to actual claims experience as time passes.

Notes to the Financial Statements

### 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

#### 3. Insurance and Financial Risk Management (continued)

#### (a) Insurance Risk (continued)

The initial loss-ratio estimate is an important assumption in the estimation technique and is based on previous years' experience, adjusted for factors such as premium rate changes, anticipated market experience and historical claims inflation. The initial estimate of the loss ratios used for the current year (before reinsurance) is analysed by type of risk and industry where the insured operates for current and prior year premiums earned.

The estimation of IBNR is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company, where information about the claim event is available. IBNR claims may not be apparent to the insured until many years after the event that gave rise to the claims. For casualty contracts, the IBNR proportion of the total liability is high and will typically display greater variations between initial estimates and final outcomes because of the greater degree of difficulty of estimating these liabilities.

In estimating the liability for the cost of reported claims not yet paid, the Company considers any information available from loss adjusters and information on the cost of settling claims with similar characteristics in previous periods. Large claims are assessed on a case-by-case basis or projected separately in order to allow for the possible distortive effect of their development and incidence on the rest of the portfolio.

#### Sensitivity analysis of actuarial liabilities

Actuarial liabilities comprise 100% of total insurance liabilities. The determination of actuarial liabilities is sensitive to a number of assumptions, and changes in those assumptions could have a significant effect on the valuation results. These factors are discussed below.

#### Actuarial assumptions

- (i) In applying the noted methodologies, the following assumptions were made:
  - With respect to the analysis of the incurred claims development history, the level of outstanding claims reserve adequacy is relatively consistent (in inflation adjusted terms) over the experience period.
  - With respect to the analysis of the gross and net paid claims development history, the rate of payment of ultimate incurred losses for the recent history is indicative of future settlement patterns. This assumption was based on our discussion with management and the change in the Company's claims settlement practices in recent years.
  - With respect to the Bornhuetter-Ferguson method, the average on-level ultimate net loss ratios are representative of recent historical loss ratios.
  - The claims inflation rate implicit in the valuation is equivalent to the rate which is part of the historical data.
  - Claims are expressed at their estimated ultimate undiscounted value, in accordance with the requirement of the Insurance Act, 2001.

#### Provision for adverse deviation assumptions

The basic assumptions made in establishing insurance reserves are best estimates for a range of possible outcomes. To recognise the uncertainty in establishing these best estimates, to allow for possible deterioration in experience and to provide greater comfort that the reserves are adequate to pay future benefits, the appointed actuary is required to include a margin for adverse deviation in each assumption.

#### Development of claim liabilities

In addition to sensitivity analysis, the development of insurance liabilities provides a measure of the Company's ability to estimate the ultimate value of claims. The table below illustrates how the Company's estimate of the ultimate claims' liability for accident years 2017 - 2022 has changed at successive year-ends, up to 2022. Updated unpaid claims and adjustment expenses ("UCAE") and IBNR estimates in each successive year, as well as amounts paid to date are used to derive the revised amounts for the ultimate claims' liability for each accident year, used in the development calculations.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

### 3. Insurance and Financial Risk Management (continued)

### (b) Reinsurance risk

The Company relies upon reinsurance agreements to limit the potential for losses and to increase its capacity to write insurance. Reinsurance arrangements are effected under reinsurance treaties and by negotiation on individual risks. Reinsurance does not relieve the Company from liability to its policyholders. To the extent that a reinsurer may be unable to pay losses for which it is liable under the terms of the reinsurance agreement, the Company is exposed to the risk of continued liability for such losses. However, in an effort to reduce the risk of non-payment, the Company requires all of its reinsurers to have a Standard & Poor or equivalent rating of BBB or better.

To limit its exposure of potential loss on an insurance policy, the insurer may cede certain levels of risk to a reinsurer. The Company selects reinsurers who have established capability to meet their contractual obligations and which generally have high credit ratings. The credit ratings of reinsurers are monitored.

Retention limits represent the level of risk retained by the insurer. Coverage in excess of these limits is ceded to reinsurers up to the treaty limit.

Facultative reinsurance placements are independent of the Company reinsurance treaties and all facultative placements are individually rated.

The amount of reinsurance recoveries recognised during the year is as follows:

	2022 \$'000	2021 \$'000
Property	34,487,886	3,929,435
Motor	18,084	10,677
Marine	1,400	479
Accident	140,846	182,424
Engineering	12,703	8,518
	34,660,919	4,131,533

## (c) Financial risk

The Company is exposed to financial risk through its financial assets and financial liabilities. In particular the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance contracts. The most important components of this financial risk include market risk (currency risk, interest rate risk and other price risk), liquidity risk and credit risk.

These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The risks that the Company primarily faces due to the nature of its investments and liabilities are interest rate risk, credit risk and market risk. The Company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects of the Company's financial performance.

## (i) Credit risk

The Company takes on exposure to credit risk, which is the risk that its customers, clients or counterparties will cause a financial loss for the Company by failing to discharge their contractual obligations. Credit exposures arise principally from the amounts due from reinsurers, amounts due from insurance contract holders and insurance brokers, and investment activities. The Company manages its credit risk, using the credit review process as outlined below.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

### 3. Insurance and Financial Risk Management (continued)

### (c) Financial risk (continued)

#### (i) Credit risk (continued)

#### Credit review process

The Company has established a credit control team which analyses and assesses the ability of customers and other counterparties to meet repayment obligations.

(i) Reinsurance

The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalisation of any contract. The team assesses the creditworthiness of all reinsurers and intermediaries by reviewing credit grades provided by rating agencies and other publicly available financial information.

(ii) Premium and other receivables

The credit control team examines the payment history for significant contract holders with whom they conduct regular business. Management information reported to the Company includes details of provisions for impairment on loans and receivables and subsequent write-offs. Internal audit performs regular reviews to assess the degree of compliance with the Company's credit policies. Exposures to individual policyholders and groups of policyholders are managed within the ongoing monitoring of the controls associated with regulatory solvency.

(iii) Investments

The Company limits its exposure to credit risk by investing mainly in liquid securities, with counterparties that have high credit quality and Government of Jamaica securities. Accordingly, management does not expect any counterparty to fail to meet its obligations.

(iv) Cash and bank

The Company limits its exposure to credit risk by placing cash and deposits with counterparties that are regulated and publicly disclose their financial information. Management assesses each counterparty's credit quality and levels of liquidity. Accordingly, management seeks to mitigate the risk that any single counterparty will fail to meet its obligations. Furthermore, management takes steps to diversify its cash and bank among a group of counterparties in order to further mitigate the risk of loss.

## a) Asset bearing credit risk

	Maximum E	xposure
	2022 \$'000	2021 \$'000

(expressed in Jamaican dollars unless otherwise indicated)

## 3. Insurance and Financial Risk Management (continued)

## (c) Financial risk (continued)

## (i) Credit risk (continued)

## b) Credit quality of reinsurance and financial assets

The credit quality of financial assets can be assessed by reference to external credit ratings, if available, or to a rating assigned by the investment manager using an approach consistent with that used by Standard and Poor's.

## AAA

An obligation rated 'AAA' has the highest rating assigned by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

## AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment is very strong.

# Α

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

## BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

## **Below BBB**

Obligations rated 'Below BBB' are regarded as having significant speculative characteristics. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

## Not Rated

This indicates that there is insufficient information on which to base a rating. These balances are current and are monitored regularly for impairment. This classification mainly includes obligations due from individuals and short-term securities.

#### c) Loss allowance

The following tables show reconciliations from the opening to the closing balance of the loss allowance by class of financial asset. Reconciling items include the following:

- New assets originated or purchased, which reflect the allowance related to assets newly recognized during the period.
- Assets derecognised, which reflect the allowance related to assets derecognized during the period
  without a credit loss being incurred, including those assets that were derecognized following a
  modification of terms.
- Net transfer to/(from) 12-month ECL and lifetime ECL, which are presumed to occur before any corresponding remeasurement of the allowance.
- Remeasurements, which comprise the impact of changes in model inputs or assumptions, including changes in forward-looking macroeconomic conditions; changes in the measurement following a transfer between 12-month ECL and lifetime ECL; and unwinding of the time value discount due to the passage of time.

(expressed in Jamaican dollars unless otherwise indicated)

### 3. Insurance and Financial Risk Management (Continued)

### (c) Financial risk (continued)

### (i) Credit risk (continued)

### c) Loss allowance (continued)

#### Cash and cash equivalents

Impairment on cash and bank balances measured at amortised cost has been measured on the 12-month expected loss basis and reflects the short maturities of the exposures. The Company uses a similar approach for the assessment of expected credit losses for cash and cash equivalents to those used for debt

The amount of the allowance increased by \$542,000 during the year to \$12,194,000 (2021 - \$11,652,000).

#### **Credit Risk - Economic Variable Assumptions**

The most significant period-end assumptions used for the ECL estimate as at 31 December 2022 and 2021 are set out below.

The PDs and LGDs are impacted by long-term changes in the various data sets gathered from external rating agencies such as Moody's. Macroeconomic variables used in the Company's ECL models also include, but are not limited to, gross domestic product growth, inflation rates, national budget deficits, debt to GDP ratio.

Refer to the table below for the ranges applied to each scenario for the two most significant assumptions. The weighting assigned to each scenario as at 31 December 2022.

	GDP Growth assumption	Inflation assumption	Weights
Base scenario	Stable	Positive	65% - 70%
Optimistic	Positive	Positive	5% - 10%
Pessimistic	Negative	Negative	15% - 20%
pessimistic	Negative	Negative	5% - 10%

Refer to Note 6 for descriptions of the scenarios.

#### Credit Risk - Sensitivity analysis

Set out below are the changes in ECL allowance at the reporting date that would result from a reasonably possible change in the PDs used by the Company.

			% Change		
	Actual PDs applied		in PD	Impact on	ECL
	2022	2021		2022 \$'000	2021 \$'000

## 3. Insurance and Financial Risk Management (Continued)

## (c) Financial risk (continued)

## (i) Credit risk (continued)

## d) Concentrations of risks of reinsurance and financial assets with credit risk exposure

Concentrations arise when a number of counterparties are engaged in similar business activities, or activities in the same geographical region, or have economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic, political or other conditions. Concentrations indicate the relative sensitivity of the Company's performance to developments affecting a particular industry.

The following table breaks down the Company's main credit risk exposure as categorised by the industry sectors of its counterparties.

	2022 \$'000	2021 \$'000
Financial services and corporate	3,987,555	3,773,166
Public sector	4,256,104	3,987,933
Insurance and reinsurance	3,333,463	4,012,058
Other industries	5,445	28,199
	11,582,567	11,801,356

## (ii) Liquidity Risk

Liquidity risk is the risk that the Company is unable to meet its payment obligations associated with its financial liabilities when they fall due and to replace funds when they are withdrawn. The consequence may be the failure to meet obligations to fulfil claims and other liabilities incurred.

## Liquidity risk management process

The Company's liquidity management process includes:

- (i) Monitoring future cash flows and liquidity on a daily basis. This incorporates an assessment of expected cash flows and the availability of high grade collateral which could be used to secure funding if required.
- (ii) Maintaining a portfolio of highly marketable assets that can easily be liquidated as protection against any unforeseen interruption to cash flow.
- (iii) Optimising cash returns on investment.
- (iv) Monitoring statement of financial position liquidity ratios against internal and regulatory requirements. The most important of these is to maintain limits on the ratio of net liquid assets to claims liabilities.

Monitoring of cash flows is done on a daily basis to ensure that the Company maintains sufficient liquid assets to honour its short-term obligations as they fall due.

(expressed in Jamaican dollars unless otherwise indicated)

### 3. Insurance and Financial Risk Management (Continued)

#### (c) Financial risk (continued)

#### (ii) Liquidity Risk (continued)

#### Financial liabilities cash flows

The table below presents the undiscounted cash flows payable with respect to the Company's financial liabilities, based on contractual repayment obligations as at 31 December.

		Contracte	d/Expected Und	sclosed Cash	flows
-	Carrying amount \$'000	Less than 1 year \$'000	1 to 5 years \$'000	Over 5 years \$'000	Total \$'000
As at 31 December 2022:	+ • • • •	<i> </i>	<b>+ •••</b>	<i> </i>	+ • • • •
Claims outstanding	4,829,836	2,104,316	2,206,310	519,210	4,829,836
Due to reinsurers and	1,865,982	1,865,982	-	-	1,865,982
Other creditors	159,346	159,346	-	-	159,346
Lease liabilities	60,089	25,017	45,125	-	70,142
Total financial liabilities (contractual maturity dates)	6,915,253	4,154,661	2,251,435	519,210	6,925,306

	_	Contracte	d/Expected Und	isclosed Cashi	flows
	Carrying amount	Less than 1 year	1 to 5 years	Over 5 years	Total
As at 31 December 2021:	\$'000	\$'000	\$'000	\$'000	\$'000
Claims outstanding	5,452,855	2,575,299	2,372,042	505,514	5,452,855
Due to reinsurers and	1,337,692	1,337,692	-	-	1,337,692
Other creditors	152,537	152,537	-	-	152,537
Lease liabilities	40,863	13,910	26,953	-	40,863
Total financial liabilities (contractual maturity dates)	6,983,947	4,079,438	2,398,995	505,514	6,983,947

Assets available to meet all of the liabilities and to cover financial liabilities include cash and bank balances and investment securities.

#### (iii) Market risk

Market risk is the risk that the fair value or future cashflows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk – currency risk, interest rate risk and other price risk, each of which are considered below.

There has been no change to the Company's exposure to market risks or the manner in which it manages and measures the risk.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 3. Insurance and Financial Risk Management (Continued)

#### (c) Financial risk (continued)

#### (iv) Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company manages its foreign exchange net exposure by ensuring that it continuously monitors its foreign currency position to ensure that there are adequate foreign assets available to meet its foreign liabilities.

The Company also has transactional currency exposure. Such exposure arises from having financial assets in currencies other than those in which financial liabilities are expected to settle.

#### Concentrations of currency risk

The table below summarises the Company's exposure to foreign currency exchange rate risk at 31 December.

	Jamaican\$ \$'000	US\$ \$'000	Impairment \$'000	Total \$'000
At 31 December 2022:	·	·	·	
Financial Assets				
Investment securities	5,508,360	1,707,548		7,215,908
Due from policyholders, brokers and agents	456,377	863,059	(17,659)	1,301,777
Recoverable from reinsurers	990,085	1,073,221	-	2,063,306
Other receivables	3,606	-	-	3,606
Cash and cash equivalents	1,803,669	936,133	(12,194)	2,727,608
Total assets	8,762,097	4,579,961	(29,853)	13,312,205
Financial Liabilities				
Insurance reserves	3,681,658	1,148,178	-	4,829,836

#### Foreign currency sensitivity

The following tables show the sensitivity of the Company's net profit and equity to changes in the rate of exchange for the currency to which the Company had significant exposure, the US dollar. The change in currency rate below represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis is done for outstanding foreign currency denominated monetary items and adjusts their translation at the year end for a 5% (2021: 5%) change in foreign currency rates. The percentage change in the currency rate will impact each financial asset/liability included in the sensitivity analysis differently. Consequently, individual sensitivity analyses were performed. The effect on net profit shown below is the total of the individual sensitivities done for each of the assets/liabilities. There is no impact on equity.

	% Change in	Effect on Net	% Change in	Effect on Net
	Currency	Profit	Currency	Profit
	Rate	2022	Rate	2021
	2022	\$'000	2021	\$'000
<b>Currency:</b> USD – Positive USD – Negative	5% 5%	80,638 (80,638)	5% 5%	97,898 (97,898)

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

### 3. Insurance and Financial Risk Management (Continued)

### (c) Financial risk (continued)

#### (v) Interest rate risk

Interest rate risk is the risk that the value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

Floating rate instruments expose the Company to cash flow interest risk, whereas fixed interest rate instruments expose the Company to fair value interest risk.

The Company's interest rate risk policy requires it to manage interest rate risk by maintaining an appropriate mix of fixed and variable rate instruments. The policy also requires it to manage the maturities of interest bearing financial assets and interest bearing financial bearing liabilities.

In respect of the interest bearing accounts held in cash and bank, these amounts have a short time to maturity and are maintained at market rates, accordingly, these are not significantly exposed to interest rate risk.

The sensitivity analysis for interest rate risk illustrates how changes in the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates at the reporting date. For the sensitivity analysis, a 1% movement in interest rates was used for 2022 for the Jamaican market (2021 - 1%) and a 2% movement was used for 2022 for the United States market (2021 - 2%). The following table shows the estimated effect of an increase or decrease in the above rates on the profit or loss and fair value reserve.

	Effect on	Effect on	Effect on	Effect on
	Net Profit	Equity	Net Profit	Equity
	2022	2022	2021	2021
	\$'000	\$'000	\$'000	\$'000
Increase in interest rates	6,283	611,110	12,138	574,348
Decrease in interest rates	(4,631)	(471,187)	(7,838)	(526,247)

#### (vi) Price risk

The Company is exposed to equity securities price risk because of investments held by the Company on the statement of financial position classified at fair value through profit or loss. The Company is not exposed to commodity price risk. To manage its price risk arising from investments in equity securities, the Company diversifies its portfolio. The Company's investments in equity of other entities are publicly traded on the Jamaica Stock Exchange or other international stock exchanges, with the exception of the unquoted equities disclosed in Note 13.

## Price sensitivity

The table below summaries the impact of increases/decreases of equity securities process on the Company's post-tax profit for the year and on equity. The analysis is based on the assumption that the equity index has increased/decreased by 10% with all other variables held constant.

	Effect on Net Profit	Effect on Net Profit
	2022 \$'000	2021 \$'000
Change in basis points:	<b>\$ \$ \$ \$</b>	<b>\$ 000</b>
-10 % (2022: -15%)	(165,428)	(193,723)
+10 % (2021: +15%)	165,428	193,723

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 4. Capital Management

The Company's objectives when managing capital, which is a broader concept than the 'equity' on the face of the statement of financial position, are:

- (i) To comply with the capital requirements set by the regulators of the insurance industry within which the Company operates;
- (ii) To safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for stockholders and benefits to other stakeholders; and
- (iii) To maintain a strong capital base to support the development of its business.

Capital adequacy is managed by the Company's management. It is calculated by management, certified by the appointed actuary and reviewed by executive management, the audit committee and the board of directors. In addition, the Company seeks to maintain internal capital adequacy ratios at levels higher than the regulatory requirements. To assist in evaluating the current business and strategic opportunities, the Company currently uses the Minimum Capital Test ("MCT") as stipulated by the insurance regulations.

On January 30, 2023, the insurance regulators stipulated the pre IFRS 17 schedules that should be used for December 2022 with the minimum ratio being 175% and the post IFRS 17 schedules should be used thereafter and the minimum would fall to 150%. The catastrophe margin is based on the model approach.

	2022	2	2021	
	Actual	Minimum Standard	Actual	Minimum Standard
МСТ	204.44%	175.00%	312.56%	250%

## 5. Fair Values of Financial Instruments

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. Market price is used to determine fair value where an active market (such as a recognised stock exchange) exists as it is the best evidence of the fair value of a financial instrument.

For financial instruments where no market price is available, the fair values presented have been estimated using present value or other estimation and valuation techniques based on market conditions existing at statement of financial position date.

The values derived from applying these techniques are significantly affected by the underlying assumptions used concerning both the amounts and timing of future cash flows and the discount rates. The following methods and assumptions have been used:

- (i) Investment securities classified as fair value through profit or loss or fair value through other comprehensive income are measured at fair value by reference to quoted market prices when available. If quoted market prices are not available, then fair values are estimated on the basis of pricing models or valuation techniques such as discounted cash flow analysis;
- (ii) The carrying amount of short-term assets and liabilities maturing within one year is assumed to approximate their fair value. This assumption is applied to the short-term elements of all other financial assets and financial liabilities.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

### 5. Fair Values of Financial Instruments (Continued)

The classification of financial instruments at fair value can be determined by reference to the source of inputs used to derive the fair value. The classification uses the following three-level hierarchy:

### Level 1

Included in the Level 1 category are financial assets and liabilities that are measured by reference to quoted price in an active market. A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency and those prices represent actual and regularly occurring market transactions on an arm's length basis.

#### Level 2

Included in the Level 2 category are financial assets and liabilities that are measured using a valuation technique based on assumptions that are supported by prices from observable current market transactions, and for which pricing is obtained via pricing services, but where prices have not been determined in an active market. This includes financial assets with fair values based on broker quotes, investments in private equity funds with fair values obtained via fund managers and assets that are valued using the Company's own models whereby the majority of assumptions are market observable.

#### Level 3

Included in the Level 3 category are financial assets and liabilities that are measured using non-market observable inputs. This means that fair values are determined in whole or in part using a valuation technique (model) based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data. The main asset class in this category is unlisted equity investments. Valuation techniques are used to the extent that observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. However, the fair value measurement objective remains the same, that is, an exit price from the perspective of the Company. Therefore, unobservable inputs reflect the Company's own assumptions about the assumptions that market participants would use in pricing the asset or liability (including assumptions about risk). These inputs are developed based on the best information available which might include the Company's own data.

The following table shows an analysis of financial instruments (excluding reverse repurchase agreements and interest receivable) recorded at fair value by level of fair value hierarchy:

#### Financial assets

		2022			
	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total Fair Value \$'000	
Investment securities at fair value through profit or - Equity securities Investment securities at fair value through other comprehensive income:	r <b>loss:</b> 1,627,754	25,956	75,928	1,729,638	
- Debt securities	-	5,373,935	1,838	5,375,773	
	1,627,754	5,399,891	77,766	7,105,411	

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 5. Fair Values of Financial Instruments (Continued)

Financial assets (continued)

		2021			
	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total Fair Value \$'000	
Investment securities at fair value through profit of - Equity securities Investment securities at fair value through other comprehensive income:	or loss: 1,790,456	25,483	121,287	1,937,226	
- Debt securities		5,688,052	1,838	5,689,890	
	1,790,456	5,713,535	123,125	7,627,116	

There were no transfers between Level 1 and Level 2 during the year.

The fair values of the equity securities in Level 1 are based on price quotations at the reporting date.

The debt securities are comprised of government bonds, corporate bonds, certificate of deposits and reverse repurchase agreements. Government bonds and corporate bonds are valued using interpolated yields derived from quoted prices of similar instruments or broker quotes from market makers. The carrying amount of certificates of deposit and reverse repurchase agreements maturing within one year is assumed to approximate their fair value.

There was \$45,359,000 (2021 - \$71,625,000) movement between the opening and closing recorded amount of Level 3 assets and which are recorded at fair value.

## 6. Critical Accounting Estimates and Judgements in Applying Accounting Policies

Judgements and estimates are continually evaluated and are based on historical experience and other factors, indicating expectations of future events that are believed to be reasonable under the circumstances. The Company makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are as follows:

#### Sources of estimation uncertainty

#### (a) Income taxes

Estimates are required in determining the provision for income taxes. There are some transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made (Notes 11 and 19).

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 6. Critical Accounting Estimates and Judgements in Applying Accounting Policies (Continued)

## Sources of estimation uncertainty (continued)

#### (b) Ultimate liability arising from claims

The determination of the liabilities under insurance contracts represents the liability for future claims payable by the Company based on contracts for the insurance business in force at the statement of financial position date using several methods, including the Paid Loss Development method, the Incurred Loss Development method, the Bornhuetter-Ferguson Paid Loss method, the Bornhuetter-Ferguson Incurred Loss method and the Frequency-Severity method. These liabilities represent the amount of future premiums that will, in the opinion of the actuary, be sufficient to pay future claims relating to contracts of insurance in force, as well as meet the other expenses incurred in connection with such contracts. A margin for risk or uncertainty (adverse deviations) in these assumptions is added to the liability. The assumptions are examined each year in order to determine their validity in light of current best estimates or to reflect emerging trends in the Company's experience. (Note 3(a)). At December 2022, the carrying amounts of short-term insurance contracts (claims) was \$4.83 billion (2021 - \$5.45 billion) (Note 15(i)).

#### (c) Fair value of financial instruments

The fair value of financial assets that are not traded in an active market is determined by using an internally developed bond valuation model. Assumptions used in this model are validated and periodically reviewed internally by qualified personnel. Where applicable, data is calibrated to ensure that outputs reflect actual data and comparative market prices. Changes in assumptions used in valuations could affect reported fair value of financial assets. Key assumptions are based on current market yields. At 31 December 2022, the carrying amount of financial assets that were fair valued using an internally developed bond valuation model was \$5.38 billion (2021 - \$5.69 billion) (Note 5).

The following table shows the effect on the profit or loss and fair value reserve to changes in the market yields.

	Effect fair value i		Effect of fair value ro	
	2022		2021	
	\$'M	\$'M	\$'M	\$'M
Decrease/(increase) in market yields (+ / - 2%)	611,110	(471,187)	582,186	(538,385)

## (d) Post-retirement medical plan

In conducting valuation exercises to measure the effect of the post-retirement medical plan, the company's external qualified actuaries use judgment and assumptions in determining discount rates and health care costs. These assumptions are detailed in Note 25.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 6. Critical Accounting Estimates and Judgements in Applying Accounting Policies (Continued)

### Sources of estimation uncertainty (continued)

Judgements in applying accounting policies

### (a) Business model assessment

Classification and measurement of financial assets depends on the results of the SPPI and the business model test. The Company determines the business model at a level that reflects how groups of financial assets are managed together to achieve a particular business objective. This assessment includes judgment reflecting all relevant evidence including how the performance of the assets is evaluated and their performance measured, the risks that affect the performance of the assets and how these are managed and how the managers of the assets are compensated.

The Company monitors financial assets measured at amortised cost or fair value through other comprehensive income that are derecognised prior to their maturity to understand the reason for their disposal and whether the reasons are consistent with the objective of the business for which the asset was held. Monitoring is part of the Company's continuous assessment of whether the business model for which the remaining financial assets are held continues to be appropriate and if it is not appropriate whether there has been a change in business model and so a prospective change to the classification of those assets.

#### (b) Impairment losses on financial assets

The measurement of expected credit loss allowance for financial assets measured at amortised cost and fair value through other comprehensive income requires judgement, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

The Company's expected credit loss calculations are outputs of models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the expected credit loss models that are considered accounting judgements and estimates include:

- The Company's criteria for assessing if there has been a significant increase in credit risk and so allowances for financial assets should be measured on a lifetime expected credit loss basis and the qualitative assessment
- · The segmentation of financial assets when their ECL is assessed on a collective basis
- · Development of ECL models, including the various formulas and the choice of inputs
- Use of macroeconomic data for internal credit ratings and outlooks, to derive associated probabilities of default as prescribed by external rating agencies such as Standard & Poor's and Moody's
- Development of forward-looking scenarios probability weighted based on macroeconomic trends and
  expectations
- Determination of associations between macroeconomic scenarios and, economic inputs and the effect on probabilities of default, exposure at default and loss given default

The Company regularly reviews its internal models in the context of actual loss experience and adjust when necessary.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

### 6. Critical Accounting Estimates and Judgements in Applying Accounting Policies (Continued)

#### Sources of estimation uncertainty (continued)

Judgements in applying accounting policies (continued)

#### (b) Impairment losses on financial assets (continued)

#### Forward-looking macroeconomic variables

The estimation and application of forward-looking information requires significant judgment. PD and LGD inputs used to estimate Stage 1 and Stage 2 credit loss allowances are modelled based on the macroeconomic variables (or changes in macroeconomic variables) that are most closely correlated with credit losses in the relevant portfolio. The estimation of ECL on 12-month ECL and Lifetime ECL is a discounted probability-weighted estimate that considers three future macroeconomic scenarios, with macroeconomic projections varying by territory. The base case scenario assumes that a stable economic environment where current conditions, based on available macroeconomic data, will largely continue. Upside and downside scenarios are set relative to the base case scenario based on reasonably possible alternative macroeconomic conditions, considering macroeconomic forecasts and trends.

#### **Covid-19 Pandemic**

For the two previous financial years, to incorporate the economic impact of the COVID-19 pandemic, the Company made adjustments to its ECL models such as increasing the likelihood of pessimistic scenarios and overlaying a further pessimistic scenario that explicitly accounts for acute negative economic fallout. For the year ended 31 December 2022, the overlay for the acute negative scenario remains; however, the likelihood attributed to this and other pessimistic scenarios have been further reduced given the improvements in the current and expected economic environment. The resulting probability of default and losses given default were applied to all financial assets with credit risk.

Management also maintains the position that the lifetime default risk of assets with several years remaining to maturity has not significantly changed since the onset of the COVID-19 pandemic, an important factor given that IFRS 9 requires that entities assess the risk of default over the life of expected assets. Such assets account for a significant portion of the Company's investment portfolio.

The carrying amount of impairment provisions on financial assets as at 31 December 2022 was \$41,492,000 (2021 - \$57,939,000) (Note 3(c)(i)).

#### (c) Property and equipment and intangible assets

Management exercises judgement in determining whether costs incurred can accrue significant future economic benefits to the Company to enable the value to be treated as a capital expense. Further judgement is applied in the annual review of the useful lives of all categories of property and equipment and intangible assets, and the resulting depreciation or amortisation determined thereon. (Note 2.12).

#### 7. Responsibilities of the Appointed Actuary and External Auditors

The Board of Directors pursuant to the Insurance Act, 2001 appoints the actuary. The actuary's responsibility is to carry out an annual valuation of the Company's insurance reserves in accordance with accepted actuarial practice and regulatory requirements and report thereon to the policyholders and shareholders.

The shareholders pursuant to the Jamaican Companies Act appoint the external auditors. Their responsibility is to conduct an independent and objective audit of the financial statements in accordance with International Standards on Auditing and report thereon to the shareholders. In carrying out their audit, the auditors also make use of the work of the appointed actuary and the actuary's report on the insurance liabilities.

#### 11. Taxation

Taxation is based on the profit for the year adjusted for taxation purposes and comprises income tax at 33 1/3%:

	2022	2021
	\$'000	\$'000
Current income tax	170,862	205,916
Prior year over accrual	(75,421)	-
Deferred income tax (Note 19)	(47,581)	49,494
	47,860	255,410

The tax charge on the Company's profit differs from the theoretical amount that would arise using the statutory tax rate as follows:

	2022 \$'000	2021 \$'000
Profit before taxation	622,520	873,808
Tax calculated at a rate of 33 1/3% Adjusted for effects of:	207,507	291,269
Income not subject to tax	(786)	(1,068)
Expenses not deductible for tax	9,543	10,764
Prior year over accrual	(75,421)	-
Other	(92,983)	(45,555)
Income tax expense	47,860	255,410

(expressed in Jamaican dollars unless otherwise indicated)

## 16. Other Receivables

		2022 \$'000	2021 \$'000
	Staff loans and advances	-	205
	Prepayments	85,441	12,423
	Due from related parties (Note 23 (b))	-	8
	Sundry receivables	3,606	26,147
		89,047	38,783
17.	Cash and cash equivalents		
		2022 \$'000	2021 \$'000
			+ • • • •
	Cash and bank balances – J\$	1,803,669	1,169,164
	Cash and bank balances – J\$ Cash and bank balances – US\$		
		1,803,669	1,169,164
		1,803,669 930,963	1,169,164 782,399
	Cash and bank balances – US\$	1,803,669 930,963 2,734,632	1,169,164 782,399 1,951,563
	Cash and bank balances – US\$ Deposits on call	1,803,669 930,963 2,734,632 5,170	1,169,164 782,399 1,951,563 36,145

The weighted average effective interest rates on cash balances for the year were as follows:

	2022	2021
Cash at bank and call deposits	%	%
- J\$	0.02	0.60
- US\$	0.01	0.01

In an effort to maximise interest income, the Company transfers cash from short-term deposits to its current accounts only when required.

## 18. Share Capital and Other Capital Reserves

# (a) Share Capital:

	2022 No. of Shares ('000)	2021 No. of Shares ('000)
Authorised – ordinary shares of no par value: 1 January and 31 December	462,575	462,575
Issued and fully paid - ordinary shares of no par value:	\$'000	\$'000

(expressed in Jamaican dollars unless otherwise indicated)

## 19. Deferred Tax Liabilities, Net

Deferred taxes are calculated on all temporary differences under the liability method using a tax rate of 33 1/3%. Net liabilities recognised on the statement of financial position are as follows:

	2022 \$'000	2021 \$'000
Deferred tax assets	19,734	29,940
Deferred tax liabilities	(215,163)	(338,543)
Net deferred tax liabilities	(195,429)	(308,603)
	2022 \$'000	2021 \$'000
Net liabilities at beginning of year	(308,603)	(231,397)
Deferred tax charged to income tax expense (Note 11)	47,581	(49,495)
Deferred tax charged to other comprehensive income	65,593	(27,711)
Net liabilities at end of year	(195,429)	(308,603)

The movement in deferred tax during the year is as follows:

		Credited/(ch	arged) to	
	Balance at	Profit	Other	Balance
	beginning	or comprehensive		at end
	2022	loss	income	2022
	\$'000	\$'000	\$'000	\$'000
Accelerated tax depreciation	8,257	6,399	_	14,656
Investment securities	(322,915)	49,977	67,726	(205,212)
Allowance for expected credit losses	(15,628)	5,677	_	(9,951)
Post-retirement medical benefit obligation	5,935	98	(2,133)	3,900
Right-of-use assets	15,748	(14,570)	_	1,178
	(308,603)	47,581	65,593	(195,429)

		Credited/(charged) to

(expressed in Jamaican dollars unless otherwise indicated)

## 20. Other Creditors

Staff bonus and gratuity	<b>2022</b> <b>\$'000</b> 100,995	<b>2021</b> \$'000 115,778
General consumption tax and premium tax	43,532	108,164
Professional fees	16,188	15,602
Regulatory fees	9,884	8,676
Due to related parties (Note 23(b))	15,527	4,748
Other	16,752	7,733
	202,878	260,701

## 21. Retirement Benefit Plan

The Company has established a defined contribution plan covering all permanent employees. The assets of the funded plan are held independently of the Company's assets in separate trustee administered funds.

The defined contribution plan was established 1 January 2013. Employees are required to make a basic contribution of 5% of pensionable salary and may also make voluntary contributions of no more than 5%, while the Company matches employee contributions up to a maximum of 10%. Contributions for the year of 23,857,000 (2021 – 21,356,000) have been charged to the statement of comprehensive income (Note 9).

#### 22. Leases

This note provides information for leases where the Company is a lessee. There are no leases where the Company is a lessor.

## (i) Amounts recognised in the statement of financial position

The statement of financial position shows the following amounts relating to leases:

	2022 \$'000	2021 \$'000
(a) Right-of-use assets		
Buildings	56,557	40,242
	2022	2024
	2022	2021
	\$'000	\$'000
Balance at beginning of year	40,242	9,143
Additions	-	45,023
Modification of lease term	38,625	320
Depreciation charge	(22,310)	(14,244)
Balance at end of year	56,557	40,242

----

----

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

### 22. Leases (continued)

(b) Lease liabilities	2022 \$'000	2021 \$'000
Balance at beginning of year	40,863	10,968
Additions		45,023
Interest expense	6,473	1,607
Lease payments	(25,755)	(17,049)
Effect of modification to lease terms	38,625	17
Exchange rate adjustments	(117)	297
Balance at end of year	60,089	40,863
Lease liabilities		
Current	19,622	13,910
Non-current	40,467	26,953
	60,089	40,863

The total cash outflow for leases is \$25,755,000, (2021 - \$17,049,000).

## (ii) Amounts recognised in the statement of comprehensive income

The statement of comprehensive income shows the following amounts relating to leases:

	2022	2021
	\$'000	\$'000
Depreciation charge on right-of-use assets	22,310	14,244
Interest expense on lease liabilities	6,473	1,607
Total expenses related to leases	28,783	15,851

#### (iii) The Company's leasing activities and how these are accounted for

The Company leases two (2) offices. Rental contracts are typically made for fixed periods of 6 months to 8 years but may have extension options as described in (iv) below.

Contracts may contain both lease and non-lease components. The Company allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the Company is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 22. Leases (continued)

## (iii) The Company's leasing activities and how these are accounted for (continued)

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the Company, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

The Company is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of equipment and vehicles and all leases of low-value assets are recognised on a straight-line basis as an expense in the statement of comprehensive income. Short-term leases are leases with a lease term of 12 months or less. The Company has no low-value assets.

### (iv) Extension and termination options

Extension and termination options are included in the property leases across the Company. These are used to maximise operational flexibility in terms of managing the assets used in the Company's operations. The majority of extension and termination options held are exercisable only by the Company and not by the respective lessor.

Notes to the Financial Statements

# 31 December 2022

	Due from policyholders, brokers and agents:		
	National Commercial Bank Limited	32,049	19,927
	All amounts due to related parties are unsecured, non-interest bearing and	are without fixed repaym	ent terms.
(d)	Key management compensation	2022	2021
		\$'000	\$'000
	Salaries and other short-term employee benefits	80.950	72.604

Salaries and other short-term employee benefits	80,950	72,604
Long-term incentive plan (Note 9)	10,217	15,415
Statutory contributions	7,946	9,937
Pension benefits	5,139	5,275
	104,252	103,231
Directors' emoluments - Fees (Note 8)	12,942	11,751

#### 24. Dividends Paid

During the year, the Company declared and subsequently made a dividend payment of \$316,700,000 to its parent company. The dividend per share is calculated as \$0.68.

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

## 25. Employee Benefit Obligation

Post-retirement medical benefits

	2022 \$'000	2021 \$'000
Present value of obligation	<b>\$ 000</b> 11,700	<b>\$ 000</b> 17,800
Net liability in statement of financial position	11,700	17,800
		11,000
The amounts recognised in the statement of comprehensive income are as follows:		
Interest on obligation	6,400	1,100
Net cost for year recognised in the statement of comprehensive income (Note 9)	1,400	1,600
Items in Other Comprehensive Income (OCI):		
Re-measurement loss of employee benefit obligation, gross	(6,400)	(1,300)
Net cost from statement of comprehensive income	(5,000)	300
Re-measurement of employee benefit obligation, gross	(6,400)	(1,300)
Deferred income tax (Note 19)	2,133	433
Re-measurement of employee benefit, net of tax	(4,267)	(867)
· · · · · · · · · · · · · · · · · · ·	<b>-</b>	
Movements in the net liability recognised in the statement of financial position are as		40.000
Net liability at start of year	17,800	18,600
Net cost from statement of comprehensive income	(5,000)	300
Contributions paid by employer	(1,100)	(1,100)
	11,700	17,800
Principal actuarial assumptions at the statement of financial position date:		
Discount rate at end of year (pa)	13.00%	8.00%
Rate of increase in medical claims cost/premiums (pa)	8.50%	8.00%

The mortality assumptions used for the pensioners are based on the GAM 94 Tables for Pensioners with ages reduced by five years.

The sensitivity of the defined benefit obligation to changes in the principal assumptions is:

	Impact on pos	Impact on post-employment obligations		
		2022		
	Change in assumption	Increase in assumption \$'000	Decrease in assumption \$'000	
Discount rate	1.00%	(10,807)	10,807	
Medical cost	1.00%	12,677	(12,677)	

	Impact on pos	Impact on post-employment obligations 2021		
	Change in assumption	Increase in assumption \$'000	Decrease in assumption \$'000	
Discount rate	1.00%	(16,187)	19,802	
Medical cost	1.00%	19,802	(16,187)	

Notes to the Financial Statements

# 31 December 2022

(expressed in Jamaican dollars unless otherwise indicated)

	(169,830)	(109,111)
Impairment losses reversed during the year (Note 10(c))	585	(20,154)
	(169,245)	(129,265)

## 27. Litigation and Contingent Liabilities

The Company is subject to various claims, disputes and legal proceedings, in the normal course of business. Provision is made for such matters when, in the opinion of management and its legal counsel, it is probable that a payment will be made by the Company, and the amount can be reasonably estimated.

In respect of claims asserted against the company which, according to the principles outlined above, have not been provided for, management is of the opinion that such claims are either without merit, can be successfully defended, cannot be reasonably estimated or will result in exposure to the company which is immaterial to both the financial position and results of operations.

## 28. Subsequent Events

On 7 February 2023, the Directors declared and approved an ordinary dividend of \$0.74 per share to the ordinary shareholders.
